

Filter King LLC, South Florida's Leading Manufacturer of HVAC Air Filters, Announces Opening of 100,000 Square Foot Manufacturing Facility

- *The advanced HVAC air filter manufacturing and warehousing facility supports growing national demand for high-quality air filters*
- *Investment expected to create an additional 100 jobs over three years*

MIAMI--([BUSINESS WIRE](#))-- Filter King LLC ("Filter King" or the "Company"), a leading manufacturer of HVAC home and business air filters, announced today the opening of a new manufacturing facility in Miami, Florida. The 100,000 square foot facility, which includes production, warehousing, and distribution (10 loading docks), as well as the Company's corporate headquarters, was precipitated by surging demand for its premium quality air filters, and high growth expectations for 2024 and beyond.

"We're proud to continue our history of manufacturing excellence in South Florida," says Rick Hoskins, Founder and CEO of Filter King. "This is an opportunity to expand our manufacturing capacity to meet the Company's growing market share regionally and nationwide, and to support the local economy and workforce by bringing many more jobs to the area."

Mr. Hoskins further stated, "Our goal at Filter King is to make best in class air filters at competitive prices, achieve rapid delivery to the customer, and to accommodate any size filter needed, be it custom or standard." In December, Filter King produced over 3,800 different sizes of custom and standard HVAC air filters, showcasing the Company's bespoke manufacturing capabilities.

Filter King's products are sold through multiple channels, including, direct-to-consumer (D2C) e-commerce marketplaces and filterking.com, as well as commercial sales to condominiums, property management companies, schools, hospitals, government facilities, and HVAC service providers.
